

60 godzinne warsztaty przygotowujące do egzaminu 300-208 SISAS – poruszane zagadnienia:

1. Identity Management/Secure Access
 - 1.1. Implement device administration
 - 1.2. Describe identity management
 - 1.3. Implement wired 802.1X
 - 1.4. Implement MAB
 - 1.5. Implement network authorization enforcement
 - 1.6. Implement Central Web Authentication (CWA)
 - 1.7. Implement profiling
 - 1.8. Implement guest services
 - 1.9. Implement posture services
 - 1.10. Implement BYOD access
2. Threat Defense
 - 2.1. Describe TrustSec Architecture
 - 1.1.1. SGT Classification - dynamic/static
 - 1.1.2. SGT Transport - inline tagging and SXP
 - 1.1.3. SGT Enforcement - SGACL and SGFW
 - 1.1.4. MACsec
3. Troubleshooting, Monitoring and Reporting Tools
 - 3.1. Troubleshoot identity management solutions
 - 3.1.1. Identify issues using authentication event details in Cisco ISE
 - 3.1.2. Troubleshoot using Cisco ISE diagnostic tools
 - 3.1.3. Troubleshoot endpoint issues
 - 3.1.4. Use debug commands to troubleshoot RADIUS and 802.1X on IOS switches and wireless controllers
 - 3.1.5. Troubleshoot backup operations
4. Threat Defense Architectures
5. Identity Management Architectures
 - 5.1. Device administration
 - 5.2. Identity Management
 - 5.3. Profiling
 - 5.4. Guest Services
 - 5.5. Posturing Services
 - 5.6. BYOD Access
